Are you using the Gold Standard?

Central Venous Catheters are a risk to your health.

Don’t take the risk. Switch to the Gold Standard

Choose an AV Fistula for better dialysis outcomes and a better quality of life.

An AV Fistula
- Lasts Longer
- Has fewer infections and clotting problems
- Provides better blood flow for better dialysis
- Gives you more freedom

Act today! Talk to your healthcare team about having a vascular access assessment.
