TIPS FOR MANAGING YOUR MEDICINE

Understanding your medicine and following your medication schedule is important for managing your condition and staying healthy.

Take Medications
Take medications as your doctor has told you.

Do Not Take
Do not take over-the-counter (OTC) medications without your doctor’s approval.

Know Your Medications
The more you know the better you’ll understand your condition and how your medications help you.

Be Organized
Keep medications organized to make them safe and easy to manage.
