

F. CROWNWeb.

During 2009, Network staff participated with CMS in various activities to prepare for the launch of the CROWNWeb data reporting system. To help facilities with the transition, the Network:

- Posted continuous updates on CROWNWeb to the Network Web site.
- CROWNWeb updates were provided at all meetings of the Network Council, the MRB and the BOT.
- Recruited 20 facilities to participate in Phase II (10 in Network 9 and 10 in Network 10) and assisted them with questions they had about using the system. Reports on Phase II facilities were provided to CMS on a weekly basis.
- Continued to register users for access to CROWNWeb. At year-end 2009, Network 9/10 had approximately 800 users registered.
