

## 2008 Mineral Metabolism Management Goals

### a. Hemodialysis –

- \* All patients measured for calcium and phosphorus every month
- \*  $\geq 75\%$  of hemodialysis patient population will have a  $\text{Ca}/\text{PO}_4$  Product of  $< 55 \text{ mg}^2/\text{dL}^2$
- \* All patients will be measured for “intact” PTH quarterly  
(K/DOQI range 150-300 pg/mL)

### b. Peritoneal Dialysis –

- \* All patients measured for calcium and phosphorus every month of PD clinic visit
- \*  $\geq 75\%$  of peritoneal dialysis patient population will have a  $\text{Ca}/\text{PO}_4$  Product of  $< 55 \text{ mg}^2/\text{dL}^2$
- \* All patients will be measured for “intact” PTH quarterly  
(K/DOQI range 150-300 pg/mL)
